

Edmonton Town Centre

London Borough of Enfield

Town Centre Extension

St Modwen Developments appointed Morgan Sindall and Oxford Architects to design and construct a significant extension to the existing town centre development at Edmonton North London.

The scheme comprised an ASDA superstore with surface and roof top car parking, a Bingo Complex and 9 shop units with ancillary service areas etc. The project required significant interface works with the existing multistorey car park and retail units. In a subsequent project Oxford Architects converted the Bingo Complex into an Argos store.
