

Carterton Community College

Dining Hall Extension, Caterton, Oxfordshire

Social Space

The main hall at this school is used for a variety of activities – assemblies, drama teaching, dining and events but was not large enough to take the whole school. Oxford Architects were appointed to extend the hall and incorporate a new entrance.

The extension sits under a double curved roof with high level clerestory windows providing good natural ventilation and light. The outside wall is finished in coloured render and punctuated with random windows in coloured glass.
