SPORTS PAVILION

KINGSTON BAGPUIZE, OXFORDSHIRE

The location of the site is on the south eastern edge of Kingston Bagpuize village and is effectively the open sports area comprising of the existing football and cricket fields and the existing parking area running on the western edge of the site.

The proposal replaces the existing pavilion with a new facility that can serve multiple sports.

The pavilion contains new changing facilities for players and officials, inclusive WC's; a small club and social room with associated kitchen and servery facilities.

The new building acts as an entrance to the sport grounds. The design form is a deliberately simple aesthetic of timber and metal.

The pavilion exceeds u-values as specified in Part L of the Building Regulations and uses environmentally friendly materials with regards to embodied energy and lifespan, providing a cheap and efficient building to operate.

The new pavilion massively improves the experience for those who regularly visit and play at the sports field. The scheme constitutes a socially beneficial package with associated economic benefit to the local community.

PROJECT DETAILS

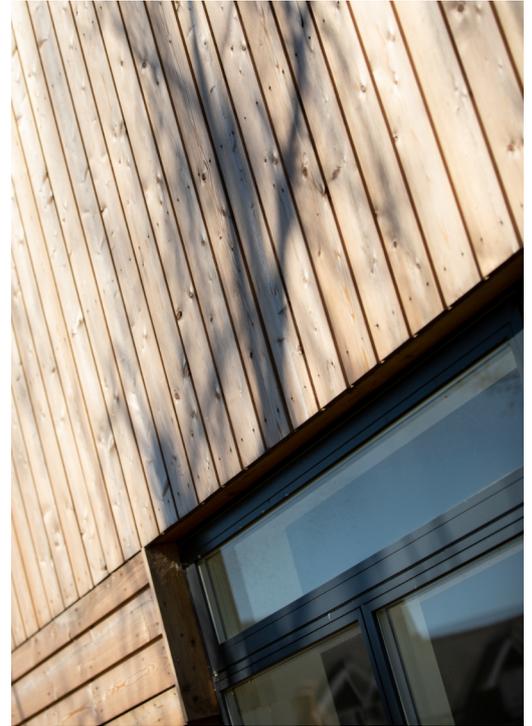

- **SCOPE**
240 sqm new multi-sport use pavilion, with changing, storage and ancillary facilities
- **ROLE**
Architect, Principal Designer
- **CLIENT**
Kingston Bagpuize Parish Council
