Outstanding Ofsted Office Fit-Out

Oxford Architects provided full architectural services, client support and contractor support for the complete refurbishment and re-design of Level 1, 2 Rivergate, Bristol.

The new design includes several brand new meeting rooms with glazed walls, new tea points, bright and colourful internal finishes across the entire floor and the specification of new furniture and fittings.

Oxford Architects worked closely with the client and various stakeholders to produce the initial concept designs for the project. The overarching aim of the brief was to create a bright, vibrant and cheerful working environment for the Ofsted staff. Oxford Architects then worked closely with the main contractor, Skansen, to successfully deliver the project on time and within budget.

OXFORD ARCHITECTS

Key Aspects

- Complete fit out of 1700 sqm office space for Ofsted
- The design promotes "working away from the desk" in specially designed touch down areas
- Responded to the clients brief of creating a bright, vibrant and cheerful office environment through the creative use of colour, furniture and manifestation
- Well thought out working zones, breakout zones and informal areas all with clear and colourful identities
- Stakeholder workshops and staff consultations to discuss the proposals and achieve end users requirements
