

Schools **Profile** 

### Introduction

As a successful practice that has operated for over 50 years, Oxford Architects has a distinguished record in producing quality education buildings from conception to occupation, encompassing new buildings, refurbishments and renovation projects. From our wealth of experience we understand the challenges and opportunities presented when designing and constructing buildings in the education sector.

The Practice provides the complete range of architectural services undertaking projects from brief formulation and the earliest stages of masterplanning through to design development, visualisation and production information to enable the competitive procurement of buildings and infrastructure.

The diverse nature of commissions we undertake includes projects for the education, research, healthcare, transport, commercial, community, industrial, and residential sectors which enables us to transfer skills and knowledge from one sector to another.

## Methodology - How We Work

We are a very approachable practice and proud of our settled, repeat client base won through excellent customer service and our ability to deliver projects. Part of our success is down to building good client relationships through meeting, listening and understanding requirements and needs. Added value comes from bringing knowledge and experience from other sectors to provide solutions that may not have been otherwise considered.

We recognise that our clients generally know their businesses better than we do and often have an understanding of what solution would work best for them. We therefore approach all projects as a partnership and through discussion and dialogue with all parties develop a response that fulfils their requirements.

## Flexible Design

Oxford Architects are a well-resourced Practice with a high Partner/
Associate to staff ratio delivering excellent customer care,
professional competence, commitment and delivery. We have a
stable and loyal workforce of some 45 people in offices in Oxford
and Bristol with the professionalism and experience to deliver the
required service for any project.

Additionally, we can also provide Party Wall, Principal Designer and Graphics Designer services in-house.

We operate a Partner/Project Architect-led approach to design and project running. The Partner and Project Architect will stay with the project from appointment through to completion and post project evaluation. As the project programme requires, they will be supplemented by our technical department and graphics support. We review programmes on a weekly basis to ensure that projects are properly resourced and mamanged.

Technical delivery is assisted by our ISO 9001 Quality Management, and ISO 14001 Environmental Management accredited systems.

We operate a wide range of computer software and are proficient in BIM Level 2.

Sustainability is at the heart of our design process. All projects are cross referenced with our sustainability check list. Senior Designer Anna Warehamis a Certified Passivhaus Designer and we have an extensive portfolio of completed BREEAM Excellent and Very Good projects.

## Schools Experience

Oxford Architects brings considerable in-depth knowledge, experience and expertise to all aspects of school building design through the collective resources of the organisation and through the professional skills of individual staff.

Our experience includes special needs schools and ranges from Nursery and Primary school provision through to Secondary and Sixth Form facilities. Encompassing both refurbishment and new school building provision we are well versed in delivering education buildings using traditional and more innovative forms of procurement.

At the strategic level we undertake site masterplanning and provide site-wide development control plans for schools. At the implementation level, our recent design and delivery experience covers the full spectrum of school buildings and facilities, from the smallest refurbishment to large multi-million pound developments, which include:

- Classrooms
- Laboratories
- Food Technology
- Performing Arts & Drama
- Sports Halls & Facilities
- Common Rooms
- Learning Resource Centres
- IT Suites
- Dining Halls & Kitchens
