

# English and Media Studies Building

Wheatley Park School, Oxfordshire

## Sustainable Arts and Media

This exciting new addition to Wheatley Park School is comprised of eight general teaching classrooms with staff offices on two storeys.

The key to this building is a curving timber clad wall that forms the enclosure to a flexible social space with randomly placed slit windows framing views to the hills to the north of the site. A highly sustainable design which is heated via ground source heating and features a 'green' roof, rainwater harvesting and natural ventilation from wind catchers.
